1. Overview

EXIN Agile Scrum Foundation (ASF.EN)

Scope

The EXIN Agile Scrum Foundation certification validates a candidate's knowledge on:

- the Agile way of thinking;
- Scrum practices;
- Scrum planning and estimation;
- monitoring Scrum projects;
- advanced Scrum concepts.

Summary

EXIN Agile Scrum Foundation tests a candidate's knowledge of Agile principles and the Scrum framework. Agile and Scrum are about working together to successfully reach the goal. Agile principles are popular in software development and are increasingly being used in other areas. The Scrum framework includes establishing cross-functional and self-managing teams, producing a working increment of software at the end of each iteration or sprint.

Context

The EXIN Agile Scrum Foundation certification is part of the EXIN Agile Scrum qualification program.

Target Group

EXIN Agile Scrum Foundation is suitable for all professionals looking to keep their knowledge up to date with the latest developments in the fields of IT and project management, particularly those leading or participating in projects. In particular, this certification is suitable for professionals working in the areas of: project management, software development, IT service management, and business management. EXIN Agile Scrum Foundation is highly recommended before starting a Scrum project.

Requirements for Certification

- Successful completion of the EXIN Agile Scrum Foundation exam.

Bloom Level

The EXIN Agile Scrum Foundation certification tests candidates at Bloom Levels 1 and 2 according to Bloom's Revised Taxonomy:

- Bloom Level 1: Remembering – relies on recall of information. Candidates will need to absorb, remember, recognize and recall.
- Bloom Level 2: Understanding – a step beyond remembering. Understanding shows that candidates comprehend what is presented and can evaluate how the learning material may be applied in their own environment. This type of questions aims to demonstrate that the candidate is able to organize, compare, interpret and choose the correct description of facts and ideas.

3. List of Basic Concepts

This chapter contains the terms and abbreviations with which candidates should be familiar.

Please note that knowledge of these terms alone does not suffice for the exam; the candidate must understand the concepts and be able to provide examples.

accountability ¹	planning
affinity estimation	planning poker
Agile Manifesto	priority
burn-down chart	product backlog (item)
burn-up chart	product goal
bus factor	Product Owner
coach	refactoring
collocated team	report
commitment	responsibility ²
communication	scaling
continuous integration	Scrum
Crystal	Scrum Master
customer	Scrum team
daily scrum	splitting teams
definition of done (DoD)	sprint
Developers	sprint backlog (item)
DSDM	sprint goal
escaped defect	sprint planning
estimation	sprint retrospective
Extreme Programming (XP)	sprint review
ideal days	story point
ideal hours	test-driven development
increment	time-box/time-boxing
information radiator	triangulation
Kanban	user story
MoSCoW	velocity
niko-niko calendar	virtual team
osmotic communication	Waterfall
pair programming	work-in-progress (WiP)

¹ The Scrum Guide makes a distinction between accountability and responsibility. Accountability means 'making sure something happens'. A person who is accountable may delegate the task.

² The Scrum Guide makes a distinction between accountability and responsibility. Responsibility means 'doing a certain task'. A person who is responsible executes the task as part of their work.
